MARKET DATA

Basic answers the key market questions. Pro adds dynamics and source quality. Advanced opens liquidity, concentration, execution and unusual-anomaly lanes.

WHAT WAS CHECKED

Checks layout, tiers, pagination and evidence wording without provider data. Primary source: Source required: missing, missing, data coverage 0%, calibrated confidence: unavailable. No confirmed source row; the report remains in conservative mode. The Advanced report adds contradiction review, an evidence capsule, a source ledger and explicit conditions for reassessment.

SECOND PROVIDER

Second provider is not confirmed, so Lens shows the gap instead of inventing confidence.

MISSING DATA

1. Pending: Current provider data is absent. · 2. Pending: Independent source confirmation is absent. · 3. Pending: Price, liquidity, holder and venue data is absent. The Advanced report adds contradiction review, an evidence capsule, a source ledger and explicit conditions for reassessment.

NEXT STEP

Local QA only; attach current independently verified evidence before real-world assessment. The Advanced report adds contradiction review, an evidence capsule, a source ledger and explicit conditions for reassessment.

Missing evidence and re-check plan

This is not a decorative list. Every gap lowers evidence coverage or blocks the paid verdict until re-verification.

M01 · CURRENT PROVIDER DATA IS ABSENT.

The evidence is not fully linked to a source, timestamp and usable freshness state. Attach an independent second source and compare both value and timestamp.

M02 · INDEPENDENT SOURCE CONFIRMATION IS ABSENT.

The evidence is not fully linked to a source, timestamp and usable freshness state. Attach an independent second source and compare both value and timestamp.

M03 · PRICE, LIQUIDITY, HOLDER AND VENUE DATA IS ABSENT.

The evidence is not fully linked to a source, timestamp and usable freshness state. Measure depth, liquidity and slippage on the same venue at the same observation time.

M04 · EXECUTION LIQUIDITY: SOURCE REQUIRED: VENUE LIQUIDITY ADAPTER

missing_source · missing_timestamp · claim_requires_source Attach an independent second source and compare both value and timestamp.

NEXT SAFE STEP
