## Customer-safe summary:

P80 LOCAL FIXTURE - NOT CUSTOMER FINAL · audit report

Delivered tier: basic. Risk score: 42/100. Confidence: 46/100. The report exposes only evidence-bound findings and explicit evidence gaps.

Report ID: VLM-P80FIXTURE-20260819-CUSTOMER

Request ID: p80-local-fixture-request

## Status and scope:

Status: analysis\_complete

Project: P80 LOCAL FIXTURE - NOT CUSTOMER FINAL

Review level: basic\_requested/basic\_delivered

Updated: 2026-08-19T14:40:00.000Z

## Report sections:

1. P80 exact immutable Audit artifact plumbing: Local deterministic storage and delivery validation only. It is not a current vulnerability or exploitability finding.
2. Finding [MEDIUM] Exact immutable Audit artifact delivery fixture: Local fixture proves storage and delivery plumbing only; current exploitability remains WITHHELD. | source=local\_fixture
3. Source-bound provider receipts: 2
4. Content-bound current receipts: 2
5. Independent upstream roots: defillama, scanner
6. Missing evidence: LOCAL\_FIXTURE\_ONLY: current deployment state, current exploitability, independent replay, source rights and exact Windows remain WITHHELD

## Next steps:

1. Do not use this fixture as a production risk decision.
2. Revalidate current public read-only state and rights before any real customer release.
